Research interests

Optimization, geometry, statistical estimation, machine learning, and robotics. My research develops **theoretical and computational tools for machine intelligence** (learning, perception and control) that enable **provably robust autonomy** in the real world.

Education

- 2016 **Sc.D. Electrical Engineering and Computer Science**, *Massachusetts Institute of Technology*.
Thesis: *Certifiably Correct SLAM*
Advisor: John J. Leonard
Minor concentration: Brain and Cognitive Science
- 2010 **M.A. Mathematics**, *University of Texas at Austin*.
Concentration: Geometric Mechanics
Advisors: Raphael de la Llave, Alan Reid
- 2008 **B.S. Mathematics**, *California Institute of Technology*.
Graduated with Honors
Advisors: David Wales, David Ben McReynolds
Minor concentration: Control and Dynamical Systems
Advisors: Jerrold Marsden, Richard Murray, Joel Burdick

Honors, awards, and fellowships

- 2020 **Best Student Paper Award**, Robotics: Science and Systems (RSS)
- 2019 **RSS Pioneer**, Robotics: Science and Systems (RSS)
- 2016 **Best Paper Award**, International Workshop on the Algorithmic Foundations of Robotics (WAFR)
- 2011 MIT Intelligence Initiative Fellowship
- 2010 – 2011 MIT Energy Initiative Fellowship
- 2008 – 2009 NSF Research Training Groups in the Mathematical Sciences (RTG) Fellowship (UT Austin, Topology)
- 2004 – 2008 Leon L. Granoff Merit Scholarship (full scholarship)

Professional appointments

Massachusetts Institute of Technology, Cambridge, MA

- 2018 – present **Postdoctoral associate**, *Laboratory for Information and Decision Systems*.

My current research aims to develop formal modeling frameworks, and associated computational tools, for constructing complex autonomous systems (e.g. robots, machine learning and/or perception systems) that come with **formal guarantees** on their end-to-end behavior.

Oculus Research/Facebook Reality Labs, Redmond, WA

- 2016 – 2018 **Research scientist**, *Surreal Vision Group*.

Developed large-scale distributed mapping and localization algorithms as part of the LiveMaps project to enable intelligent, always-on augmented- and mixed-reality devices.

Publications

Journal articles

- 2019 **David M. Rosen**, Luca Carlone, Afonso S. Bandeira, and John J. Leonard. SE-Sync: A Certifiably Correct Algorithm for Synchronization over the Special Euclidean Group. *International Journal of Robotics Research (IJRR)*, 38(2–3):95–125, March 2019. **Invited article (WAFR 2016 special issue)**.
- 2014 **David M. Rosen**, Michael Kaess, and John J. Leonard. RISE: An Incremental Trust-Region Method for Robust Online Sparse Least-Squares Estimation. *IEEE Transactions on Robotics (T-RO)*, 30(5):1091–1108, October 2014.

Peer-reviewed conference proceedings

- 2020 Frank Dellaert*, **David M. Rosen***, Jing Wu, Robert Mahony, and Luca Carlone. Shonan Rotation Averaging: Global Optimality by Surfing $SO(p)^n$. *European Conference on Computer Vision (ECCV)*, August 2020. **Spotlight (top 5%)**.
- 2020 Valentin Peretroukhin, Matthew Giamou, **David M. Rosen**, W. Nicholas Greene, Nicholas Roy, and Jonathan Kelly. A Smooth Representation of Belief over $SO(3)$ for Deep Rotation Learning with Uncertainty. *Robotics: Science and Systems (RSS)*, Corvallis, OR, July 2020. **Best Student Paper Award**.
- 2020 **David M. Rosen**. Scalable Low-Rank Semidefinite Programming for Certifiably Correct Machine Perception. *International Workshop on the Algorithmic Foundations of Robotics (WAFR)*, June 2020.

- 2013 **David M. Rosen**, Michael Kaess, and John J. Leonard. Robust Incremental Online Inference over Sparse Factor Graphs: Beyond the Gaussian Case. *IEEE International Conference on Robotics and Automation (ICRA)*, pages 1017–1024, Karlsruhe, Germany, May 2013.
- 2012 **David M. Rosen**, Michael Kaess, and John J. Leonard. An Incremental Trust-Region Method for Robust Online Sparse Least-Squares Estimation. *IEEE International Conference on Robotics and Automation (ICRA)*, pages 1262–1269, St. Paul, MN, 2012.

*Equal contribution.

Workshop papers and abstracts

- 2019 **David M. Rosen**. Towards Provably Robust Machine Perception. Presented at Robotics: Science and Systems (**RSS**) in the workshop “RSS Pioneers”, Freiburg, Germany, June 2019.
- 2017 **David M. Rosen** and Luca Carlone. Computational Enhancements for Certifiably Correct SLAM. Presented at the International Conference on Intelligent Robots and Systems (**IROS**) in the workshop “Introspective Methods for Reliable Autonomy”, Vancouver, Canada, September 2017.
- 2016 **David M. Rosen** and Luca Carlone. A Certifiably Exact Algorithm for Large-Scale $SE(3)$ Synchronization. Presented at the International Conference on Machine Learning (**ICML**) in the workshop “Gimli: Geometry in Machine Learning”, New York, NY, June 2016.
- 2015 **David M. Rosen**, Julian Mason, and John J. Leonard. Towards Lifelong Feature-Based Mapping in Semi-Static Environments. Presented at Robotics: Science and Systems (**RSS**) in the workshop “The Problem of Mobile Sensors”, Rome, Italy, July 2015.
- 2015 Roberto Tron, **David M. Rosen**, and Luca Carlone. On the Inclusion of Determinant Constraints in Lagrangian Duality for 3D SLAM. Presented at Robotics: Science and Systems in the workshop “The Problem of Mobile Sensors”, Rome, Italy, July 2015.

Technical reports

- 2017 **David M. Rosen**, Luca Carlone, Afonso S. Bandeira, and John J. Leonard. SE-Sync: A Certifiably Correct Algorithm for Synchronization over the Special Euclidean Group. Technical Report MIT-CSAIL-TR-2017-002, Computer Science and Artificial Intelligence Laboratory, Massachusetts Institute of Technology, Cambridge, MA, USA.

Preprints

- 2020 **David M. Rosen**, Kevin J. Doherty, Antonio Terán Espinoza, and John J. Leonard. Advances in Inference and Representation for Simultaneous Localization and Mapping. *Annual Review of Control, Robotics, and Autonomous Systems*. (under review)
- 2020 Yulun Tian, Kusra Khosoussi, **David M. Rosen**, and Jonathan P. How. Distributed Certifiably Correct Pose-Graph Optimization.

Selected talks

Invited keynotes

- 2018 **Certifiably Correct SLAM**: Workshop on Geometry in Machine Learning, International Conference on Machine Learning (**ICML**), Stockholm, Sweden. July 15.
- 2017 **Building Spatially-Aware Systems for Fun and Profit**: Cairo Maker Faire, Cairo, Egypt. April 8.

Invited seminars

- 2017 **The Future of Mixed Reality**: UC Berkeley Institute of Design, Berkeley, CA. December 12.
- 2016 **Towards Certifiably Robust Robotic Mapping**: Oculus Research, Redmond, WA. February 19.
- 2015 **Robust Spatial Perception for Robotics: Progress and Challenges**: UC Berkeley Robot Learning and AUTOLAB groups, Berkeley, CA. August 18.
- 2014 **Everything You Always Wanted to Know About Robotic Mapping, But Were Afraid to Ask**: Google Replicant, Palo Alto, CA. August 13.

Teaching

- Spring 2018 **Instructor, Computer Vision (CSE P576)**, *University of Washington, Seattle*.
Served as one of four instructors (together with Matthew Brown, Robert Gens, and Richard Newcombe) for the University of Washington's professional master's course in computer vision. Responsibilities included determining course scope and content, developing and delivering weekly lectures, and designing lab assignments.
- Fall 2013 **Graduate teaching assistant, Machine Learning (EECS 6.867)**, *Massachusetts Institute of Technology*.
Served as one of three graduate student teaching assistants for the MIT Electrical Engineering and Computer Science department's doctoral qualifying examination course in Machine Learning, taught by Prof. Tommi Jaakkola. Responsibilities included leading weekly recitation/tutorial sections, holding weekly office hours, and assisting in the composition and grading of weekly problem sets, the course midterm and final exams, and final course projects.

Mentoring

- 2019 **External doctoral examiner**.
External doctoral thesis reader and examiner for Fangchang Ma (MIT Aeronautics and Astronautics).
Thesis: *Algorithms for Single-View Depth Image Estimation*.
- 2018 – present **Graduate student mentor**.
Advised multiple doctoral students at MIT and other universities:
- Kevin Doherty (Massachusetts Institute of Technology)
 - Antonio Teran (Massachusetts Institute of Technology)
 - Irit Chelly (Ben Gurion University of the Negev)
- 2019 – present **Member, LIDS Mentoring Committee**.
Conceived, organized, and ran seminars and workshops on navigating the PhD experience for students affiliated with MIT's Laboratory for Information and Decision Systems.
- 2019 – present **Mentor, IDSS Postdoc-Student Mentoring Program**.
Organized and ran monthly small-group discussions on navigating the PhD experience for students affiliated with MIT's Institute for Data, Systems, and Society.

Service

Professional service

- Journal reviewer **T-RO**: IEEE Transactions on Robotics (2014, 2015, 2019, 2020)
IJRR: International Journal of Robotics Research (2016, 2017, 2019)
RA-L: IEEE Robotics and Automation Letters (2016 – 2019)
L-CSS: IEEE Control System Letters (2020)
SPL: IEEE Signal Processing Letters (2017)
- Conference reviewer **RSS**: Robotics: Science and Systems (2014 – 2019)
ICRA: IEEE International Conference on Robotics and Automation (2015 – 2019)
IROS: IEEE/RSJ International Conference on Intelligent Robots and Systems (2012, 2014 – 2019)
WAFR: International Workshop on the Algorithmic Foundations of Robotics (2018)
ISRR: International Symposium on Robotics Research (2019)
IJCAI: International Joint Conference on Artificial Intelligence (2020)
- Organizer **The Many Faces of Semidefinite Programming**: Co-organizer of a workshop on semidefinite programming at the SIAM Conference on Optimization (scheduled 2020; postponed to 2021 due to COVID-19).
RSS Pioneers: Faculty committee co-chair for the RSS Pioneers workshop; responsible for organizing invited faculty keynotes at the event (July 2020).

Departmental service

Postdoctoral representative	MIT EECS Visiting Committee: Prepared and presented a report outlining recommendations for improving the postdoctoral experience to the biennial meeting of the MIT Department of Electrical Engineering and Computer Science's Visiting Committee (April 2019).
Application reviewer	MIT EECS Graduate Admissions Committee: Reviewed applications for admission to MIT's doctoral program in Electrical Engineering and Computer Science as part of the 2019–2020 cycle (January 2020).

Software artifacts

My research has been implemented in several software packages that are commonly used in academia and industry:

- **SE-Sync:** MATLAB and C++ implementations of the SE-Sync algorithm for certifiably correct pose-graph SLAM are provided in the [SE-Sync](#) library.
- **GTSAM:** The RISE online nonlinear least-squares optimization algorithm is implemented in the Georgia Tech Smoothing and Mapping ([GTSAM](#)) library, where it appears as the `DogLegOptimizer`.
- **iSAM:** The RISE algorithm is also implemented in the incremental smoothing and mapping ([iSAM](#)) library, where it appears as the `DOG_LEG` optimizer.
